

Sytes History

We believe that our over forty years of experience in the world of RF broadcasting has placed us in the best position to supply you with state of the art, in house developed RF equipment.

With decades of manufacturing TV, FM and DAB Transmitters we offer proven equipment used by several private and public broadcasters worldwide.

With approximately 100 people in staff, most of which in technical services we grant first class equipment and know how everywhere in the world. We design in-house all the digital equipment (multimode modulators, logical systems, GNSS systems, etc.) with our digital laboratory. We also develop all the radiofrequency parts of our systems in our RF laboratory and design our complete systems with our strong mechanical design department.

With our over 18.000 complete RF SYSTEMS delivered all over the world in more than 100 countries, and thousands of FM, DAB and DIGITAL TV TRANSMITTERS (in all standards, from DVB-T/T2 to DTMB, from ISDB-T to ATSC1.0 and 3.0) which allow our customers to ride successfully their businesses, we have a long story to tell.

With our subsidiaries and partner companies, we assist and deliver to our customers locally and are ready to react to any request, enquiry or emergency.

We can be at your side with a Complete Support Plan, thanks to our Technical Support division, available 24/7 with an escalation path directly to our first-line managing officers.

HEADQUARTERS Lissone, ITALY

SPECIAL PROJECTS

Certified Quality

- Security Certificate 45001
- Ambient Certificate 14001
- Quality Certificate 9001
- Supplier Certificate 2020

Save your money!

Since the beginning we wanted to mark a difference; that is why in the era of valve amplifiers we bet on the future and we started manufacturing the first solid state amplifiers for broadcast applications.

It is thanks to the vision of who preceded us that today we can put our large experience on solid state amplifiers at the service of customers working in broadcasting and also in other fields like Military, Industrial, Medical and Scientific.

They can all count on the fact that company vision and values remained unchanged and marking the difference is still our daily goal.

We are Solid State-Only transmitters and amplifiers makers and we aim to be the best at it.

We use the latest design techniques and SWs and the best the devices market provides.

And we make them as much affordable as possible either in terms of CAPEX and OPEX whilst keeping the quality at the highest level.
